

23rd January 2007

Dear Customer of Firenock,

«Field1»
«Field2»
«Field3»
«Field4»

How are you? Firenock is reborn and alive . We are coming out with new product for this 2008 season. We have the new Firenock "G" series which do not need a magnet to work. We introduce this new Firenock in ATA 2008 Indianapolis. I have enclosed a price list and some product clamshell art for your review.

The following are highlights of Firenock 2008 offering:

- No mounting accessories required as Firenock "G" no longer need an actuator to work
- Single pack that starts as low as \$19.95
- Replacement battery pack as low as \$9.95 for 3
- Crossbow will fit most carbon and aluminum right out of the box
- Crossbow will work with both flat and half-moon as it is a hybrid design
- Auto 15 seconds shut off for your 3D and Target customer for \$19.95
- Nock and battery are interchangeable between Firenock "G" and Firenock v2.0 in the same series

The rumor you heard is correct, Easton Technical Product (the maker of Easton arrow, Hoyt bow, Reflex Bow, Fuse accessories, etc.) had sue us and effectively shut us down for over 2 months. We also notice that some of our sales rep did not notify their accounts about the Temporary Restraining Order (TRO) that were order on 30th October 2007. I have enclosed a copy of the last letter that were send out to the reps. for your information (back of this letter). Which also explain why your order(s) after Oct. 30,2007 were not filled. The new Firenock "G" as by design do not need a magnet thus it is not part of the TRO. This product will lead our effort to become the premier lighted nock maker as before, and be LEGAL.

You may already recognized that Firenock is a very engineering driven, quality obsessed, and a very innovative company. Our new Firenock "G" is the proof of our ability and answer that we have promise to you. It is indeed "The Most Advanced Lighted Nock" today. For more information about the Firenock "G", please visit us at www.firenock.com. The updated Firenock web site should inform you quite well about the new product. There video on the web site should give you a very good idea about the new Firenock "G" too.

If you have any question or concern, please do not hesitate to contact me.

Best Regards

Dorge Huang, DBA Firenock
